

10.07.2018 | LÜTZE M12-M8 connector UL listed

UL listed, M8 and M12 connectors

The automation specialist LÜTZE, based in Weinstadt, supplements its prefabricated M8 and M12 connectors with UL listed and UL recognized connectors for industrial applications on the North American market.

The inclusion of the UL listed standard for the LÜTZE M8 and M12 connectors for field cabling of machines and systems enjoyed widespread acceptance among testers in North America. This is an important requirement for European machine manufacturers seeking to enter the Canadian and American markets

Fig.: LÜTZE M8 and M12 connectors now with UL listed and UL recognized approval

LÜTZE supplies easily configurable M8 and M12 round connectors in a number of different models, with screw terminals or IDC quick connections, both for actuators and sensors and also field bus applications. There are several versions with a male, female connector, straight or angled, shielded or unshielded, with 3 to 8 poles and various pole patterns.
